EXPERIENCE

Frontend Developer – IÉSEG School Of Management (Permanent) – 2021–2024

Tasks:

- Managed all frontend aspects, including UX/UI design and implementation.
- Designed, developed, and deployed pages for main and satellite sites (1 main, 20 satellite).
- Developed custom Gutenberg blocks to enhance frontend flexibility.
- Formatted newsletters and mailings with a strong focus on responsive and accessible design.
- Continuous improvement: page redesigns, bug fixes, and performance optimizations.

Technical environment:

- Frontend: HTML5, CSS3 (Sass, Bootstrap), JavaScript ES6 (jQuery)
- Backend: PHP, MySQL
- CMS & APIs: WordPress / ACF, Ninja Forms, JSON, Google Maps API, Google StreetView API
- Design Tools: Adobe XD, Figma, InDesign, Illustrator, Photoshop, Sketch
- Tools & Utilities: npm, Git/GitHub, Sarbacane.app, Zapier

Frontend Developer – Plop Consulting (Freelance) – 2021

Tasks:

- Designed and implemented UX/UI for web applications.
- Frontend integration with a focus on responsive design and user experience.
- Performance optimizations and enhancements for seamless user interaction.
- Established a consistent global visual identity across digital platforms.

Technical environment:

- Frontend: HTML5, CSS3, JavaScript ES6
- Tools & Utilities: npm, Git/GitHub, Adobe XD, InDesign, Illustrator, Photoshop

Frontend Developer – Projet45 (Freelance) – 2020

Tasks:

- Designed UX/UI for websites with a focus on frontend interactivity.
- Frontend integration and responsive design for different devices.
- Performance optimizations to enhance loading times and user engagement.
- Developed a cohesive global visual identity.

Technical environment:

- Frontend: HTML5, CSS3, JavaScript ES6
- Tools & Utilities: npm, Git/GitHub, Adobe XD, InDesign, Illustrator, Photoshop

Frontend Developer – Manekinecoon (Freelance) – 2020

Tasks:

- Created a fully administrable site from scratch using modern frontend technologies.
- UX/UI Web Design to ensure an intuitive and engaging user experience.
- Developed and deployed frontend components.
- Established a strong and consistent visual identity.

Technical environment:

- Frontend: HTML5, CSS3, JavaScript ES6
- Backend: PHP, MySQL
- Tools & Utilities: npm, Git/GitHub
